(Affiliated to Visvesvaraya Technological University, Belagavi.)

Approved by AICTE New Delhi and Recognised by Govt. of Karnataka.

ACCREDITED BY NAAC, TWICE ACCREDITED BY NBA

Policy document On Degradable and Non-degradable waste management

AIT strictly follows the necessary measures on waste management. Institute made a waste management policy document. Waste produced from the college campus is categorized in to degradable and non degradable wastes. Degradable wastes are further classified in to dry degradable and wet degradable wastes. These types of wastes are managed by employing dry and wet waste bins throughout the campus. Dry degradable waste generated from trees is sent to **composting area** of our campus. Wet degradable waste from waste bins and canteen will be managed with the help of **municipal corporation vehicle**. Waste food (waste garbage) produced from hostels are considered as waste garbage. Every day these waste foods are collected by some **authorized person** and it is used for piggeries.

E-wastes may contain some dangerous hazardous materials (Lead, Zinc and lithium etc).Which may cause serious injury to living health. AIT identified particular **vendors (SOGO SYNERGY PVT LTD, Bengaluru)** for E-waste disposal or destruction. E-Wastes are stored at a central store before disposal or destruction and then handed over it to the certified vendors.

Main Objective of the Degradable and Non-degradable waste management policy is to maintain healthy environment in the campus.
