

APJKTU UNIVERSITY OF TECHNOLOGY
DEPT. OF COMPUTER SCIENCE AND ENGINEERING (DATA SCIENCE)

VISION

- To build competent Engineers in the stream of Data Science to cope up with the challenges of changing industry standards by facilitating learning activities to cater the societal and personal needs.

MISSION

- To provide inspired technical education in the field of Data science by creating a learning ambience aiding towards originality and innovation.
- To establish industry academia interaction to facilitate with needs of the industry and providing exposure to the students in latest tools and technology.
- To inculcate moral ethics in students enabling them to become socially committed professionals with leadership qualities.

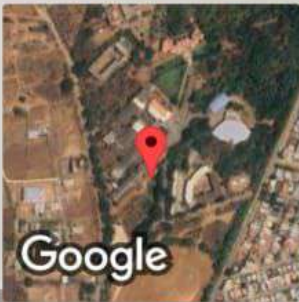

Program Educational Objectives

- To achieve competence in fundamental Science concepts to address industry requirements.
- To enrich students to acquire the industry and evolve with technology landscapes.

Program Specific Outcomes

- The students are able to use technologies which will enable real world projects with effective skills.
- The graduates will exhibit high social and professional ethics, education and research and essence of lifelong learning in Science Engineering.

ADICHUNANAGH INSTITUTE OF TECHNOLOGY
DEPT. OF COMPUTER SCIENCE AND ENGINEERING (DATA SCIENCE)

VISION

- To build competent Engineers in the stream of Data Science to cope up with the challenges of changing industry demands by facilitating learning activities to cater the societal and personal needs.

MISSION

- To provide quality technical education in the field of Data science by creating a learning ambience using learners' originality and innovation.
- To establish industry academia interaction to benefactor with needs of the industry and providing exposure to the students in latest tools and technology.
- To inculcate moral ethics in students enabling them to become socially committed professionals with leadership qualities.

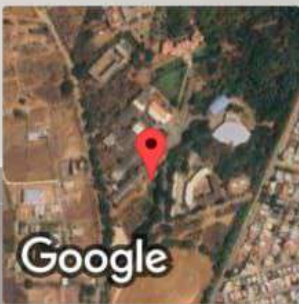

Program Educational Objective (PEO)

- To achieve competence in fundamentals of Data Science concepts to address the ever changing industry requirements.
- To enrich students to acquire skills needed by the industry and evolve with changing technology landscapes.

Program Specific Outcome (PSO)

- The students are able to use advanced tools and technologies which will enable them to adapt to real world projects with effective communication skills.
- The graduates will exhibit high standards of moral and professional ethics in pursuing higher education and research and possesses the essence of lifelong learning in the field of Data Science Engineering.
